

In re Patent Application of
Daniel Deutsch
Serial No. 10/759,542
Filed January 16, 2004

In the Claims:

Please add new claims 18-25, cancel claim 8 without prejudice and substitute the currently amended claims as set forth below in a complete listing of the pending claims. Struckthrough language indicates a deletion, and underlined language indicates an addition. The amendments include no new matter and are fully supported in the application as filed.

1.(original) A ~~motion~~-activated light comprising:

a housing containing a fluorescent material responsive to light selected from ultraviolet light and near ultraviolet light, and having a connector for connecting the light to a predetermined article;

a power source connected in an electrical circuit positioned within said housing;

a light source connected to said power source through the electrical circuit, said light source capable of emitting light including at least one of ultraviolet light and near ultraviolet light; and

a at least one switch connected to in the electrical circuit, said switch responsive to movement to thereby close said circuit so as to energize the light source[;]

~~a connector for connecting the light to a predetermined article.~~

2.(currently amended) The light of ~~Claim~~ claim 1, wherein said connector comprises a split ring.

Filed January 16, 2004

3.(currently amended) The light of ~~Claim~~ claim 1, wherein said connector comprises a cord.

4.(currently amended) The light of ~~Claim~~ claim 1, wherein said predetermined article comprises a zipper pull.

5.(currently amended) The light of ~~Claim~~ claim 1, wherein said light further comprises a power source comprises a battery connected in said electrical circuit.

6.(currently amended) The light of ~~Claim~~ claim 1, wherein said light source comprises a light emitting diode.

7.(currently amended) The light of ~~Claim~~ claim 1, wherein said switch motion comprises a vibration sensitive switch.

8-17.(cancelled)

18.(new) The light of claim 1, wherein said switch comprises a manually actuated switch.

19.(new) A light comprising:
a housing permitting at least partial transmission of light therethrough
and containing a fluorescent material responsive to light selected from
ultraviolet light and near ultraviolet light;

In re Patent Application of
Daniel Deutsch
Serial No. 10/759,542
Filed January 16, 2004

a power source connected in an electrical circuit and positioned within said housing;

a light source associated with said housing and connected to said power source through the electrical circuit, said light source capable of emitting light including at least one of ultraviolet light and near ultraviolet light; and

at least one switch connected in the electrical circuit; and

a connector formed in said housing so as to provide a point of attachment to said light.

20.(new) The light of claim 20, wherein said connector consists of an opening extending through a portion of the housing.

21.(new) The light of claim 20, wherein said connector comprises a split ring.

22.(new) The light of claim 20, wherein said connector comprises a cord.

23.(new) The light of claim 20, wherein said light source comprises a light emitting diode.

24.(new) The light of claim 20, wherein said switch comprises a motion sensitive switch.

25.(new) The light of claim 20, wherein said switch consists of a manually actuated switch.
